The power of [E]motion.

Movement is our drive. Here, we mean more than just supplying automotive spare parts in top OEM quality. We're on the move for you. With new ideas, product innovations and a passion for service. As your partner, we support you with specific solutions to meet your requirements – from basic orders to individualised consultation on our product range.
Each product from Flennor Automotive not only complies with OE specifications, but also has to meet our own strict quality standards.
And you can rely on that. And on our fair prices.

Steering and suspension parts

We have an extraordinarily breadth to our range: apart from drag links and tie rod ends we also supply rubber-metal parts, stabilizers as well as complete steering gears in top quality for a vast range of vehicle types. Furthermore, our program is being constantly extended.
Almost all our production sites comply with VDA 6.1 and TS16949.
Facts that speak for themselves – and for us.

Wheel bearing kits

The Flennor range offers you more choice! This is because we boast one of the most extensive ranges on the market. Manufactured from high quality steel our bearings are characterised by a particularly long service life. Also as regards complete sets, which, depending on version, contain all components required for assembly, the Flennor range has simply more to offer: choose from the wide product range!

Drive belts

Flennor multi-v and v-belt ranges distinguish themselves by the breadth of range and first-class OEM quality and are made of a HSN temperature-resistant rubber compound, depending on the application. We also supply both ranges in EPDM quality. The superior thermal properties and flexibility of EPDM increase service life.

Belt kits

Everything you need under one roof: **The belt kits contain drive belts, tensioners and/or idlers and/or water pumps as well as mounting material and installation instruction.** That means you have everything you need together in the best quality. Tensioners and idlers as well as water pumps can also be supplied individually upon request.

Glow plugs

Flennor GmbH will help you to get ahead – for example with glow plugs that fulfil the most demanding requirements for quality and performance characteristics. Certified according to the OEM standards ISO9002, QS9000 and TS16949, Flennor glow plugs provide for optimum pre-heating, starting and post-heating in diesel vehicles.

Sensors

As a supplement to our Wheel-bearing-kit-program Flennor offers a large selection of sensors. For example, sensors for wheel speed, camshaft, crankshaft, throttle sensor, distance, oil and coolant levels, manifold pressure and air intake temperature, as well as sensors for air flow and oxygen. The advantages: OEM quality • Large assortment • Quality certified • A**nd of course 2 years full warranty!**

Wiper blades

Whether standard blade ("ECO" line) or beam blade ("MEGA" line, "GIGA" line), Flennor has the perfect solution for every type of vehicle.
DELTA wiperblades, Flennor's brand new innovation on the wiper blade market, are completing our wiper blade program. DELTA blades feature an innovative adapter system, which is universally applicable to all vehicles irrespective of the year of construction and model.

Fuel hoses

The small diameter, multi-purpose hoses are suitable for all car fuel systems. Their cover and inner tube withstand oil and heat – over a temperature range of – 35 °C to + 125 °C, for short periods even up to + 140 °C. In addition, the hoses comply with the requirements of the standards SAE J30R7, ISO 4639-2 and DIN 73379.

Shock Absorbers

Flennor's shock absorbers assure ideal safety and comfort and master any situation. Due to high-quality materials and state-of-art manufacturing processes our shock absorbers guarantee safety, reliability, perfect adhesion and low wear and tear. Being constantly extended, our range of products will cover all the popular types of vehicles including Asian models.

Brakes

To complement our present portfolio, Flennor will be offering a large brake disc and brake blocks program in the near future. Our brake discs are completely protected from corrosion due to a special anti-corrosion coating. **And everything in the desired Flennor top-quality!**
